

**ABSTRACT**

Antisense compounds, compositions and methods are  
5 provided for modulating the expression of fibroblast growth  
factor receptor 3. The compositions comprise antisense  
compounds, particularly antisense oligonucleotides, targeted  
to nucleic acids encoding fibroblast growth factor receptor  
3. Methods of using these compounds for modulation of  
10 fibroblast growth factor receptor 3 expression and for  
treatment of diseases associated with expression of  
fibroblast growth factor receptor 3 are provided.
